

FASLULHAQ FAREES

Software Engineering Intern | B.Sc. (Hons) in IT — Sri Lanka Institute of Information Technology (SLIIT)
+94 74 379 8515 | fazlulhaqfaris076@gmail.com | github.com/haq-ops | linkedin.com/in/faslulhaqfarees

Summary

Motivated and detail-oriented B.Sc. (Hons) IT undergraduate specializing in Full Stack Development and Software Engineering. Experienced in building scalable web applications using the MERN stack, with a strong interest in integrating AI-driven solutions to solve real-world problems. Skilled in developing user-focused applications, RESTful APIs, database management, and modern software development practices. Seeking a Software Engineering Internship to contribute to impactful and innovative projects.

Education

Sri Lanka Institute of Information Technology (SLIIT) Oct 2023 – Oct 2027
B.Sc. (Hons) in IT (Information Technology)

Experience

IT Support Trainee Nov 2025 – Apr 2026
SuperValu Lanka (Pvt) Ltd *Remote*

- Completed a 6-month IT support internship, remotely supporting operational and technical matters for the company.
- Delivered assigned IT support tasks promptly and accurately, in line with company standards and confidentiality requirements.
- Maintained professional communication and adherence to company policy across all assigned responsibilities.

Freelance Full-Stack Developer 2025 – 2026
Fiverr & Direct Clients *Remote*

- Engineered and delivered 5+ full-stack web applications for direct clients and via Fiverr over 1 year.
- Architected scalable REST APIs and backend services, reducing average response time by 30%.
- Collaborated with clients across requirement gathering, code review, debugging, and deployment phases.
- Optimized database queries and application performance, improving load time by up to 40%.
- Implemented unit testing practices to ensure code reliability across all delivered projects.
- Technology Used: React, Node.js, Express.js, MongoDB, MySQL, PHP, JavaScript, HTML, CSS

Personal Projects

● **EduFlex — Microservice-Based Learning Management System** Jan 2026 – June 2026

A scalable LMS architected with microservices for online education management.

- Architected 5+ independent microservices (assessment, discussion, notifications) with an API Gateway for unified routing.
- Engineered CI/CD pipelines using GitHub Actions, reducing deployment time by 50%.
- Containerized all services using Docker, enabling consistent cloud-ready deployments across environments.
- Collaborated with team members via structured code review and Git branching workflows.
- Technology Used: Node.js, React, MySQL, Docker, Nginx, GitHub Actions, REST API, Microservices

● **Smart Campus — Campus Management System** Jan 2026 – June 2026

A full-stack smart campus platform for facilities management and incident reporting.

- Engineered a full-stack campus system with Spring Boot backend and React frontend, collaborating across 7 branches.
- Implemented facilities catalogue, maintenance incident ticketing, and role-based user management modules.
- Optimized Nginx configuration and Docker Compose setup for improved service delivery and scalability.
- Debugged and resolved critical merge conflicts and backend issues across multiple feature branches.
- Technology Used: Spring Boot, React, Vite, Docker, Nginx, Maven, GitHub Actions, AWS/GCP-ready

● QuickWay Rental — Car Rental Management System

Oct 2024

A comprehensive car rental management system for customers and administrators.

- Engineered a full-stack rental platform supporting 3 core modules: booking, inventory, and reporting.
- Optimized MySQL queries, reducing data retrieval time by 35% for admin dashboard operations.
- Implemented problem-solving workflows for vehicle availability conflict resolution in real-time bookings.
- Technology Used: PHP, HTML, CSS, JavaScript, MySQL
- github.com/haq-ops/QuickWay-Car-Rental-System

● Eco Bin — Smart Waste Management Platform

June 2025 – Dec 2025

An intelligent platform for smart waste management with real-time data monitoring.

- Architected a scalable system integrating smart bin sensors with real-time data dashboards for city-wide monitoring.
- Collaborated on software architecture design, reducing manual waste reporting effort by 60%.
- Technology Used: Express.js, React, Node.js, MongoDB

● Lostiq — AI-Powered Lost & Found Platform

2026

A smart platform to report and recover lost items using AI-based matching intelligence.

- Engineered an AI-driven matching engine using OpenAI API, achieving 80%+ item-to-report match accuracy.
- Architected a scalable backend with optimized MongoDB queries for fast real-time search and retrieval.
- Technology Used: React, Node.js, MongoDB, OpenAI API, REST API

Technical Skills

Languages: Java, JavaScript, TypeScript, PHP, HTML, CSS

Frameworks & Libraries: Spring Boot, ASP.NET Core, React, Node.js, Express.js, Tailwind CSS, Mongoose

Databases: MySQL, PL/SQL, MongoDB, SQL Server

Tools & Platforms: Git, GitHub, Version Control, Docker, Nginx, VS Code, Postman, Swagger, Maven, RESTful APIs, OpenAI

Cloud & DevOps: AWS/GCP/Azure Cloud Computing (familiar), CI/CD, Continuous Integration, GitHub Actions, Docker, Microservices Architecture

Practices: Unit Testing, Code Review, Agile Methodologies, Software Development Lifecycle (SDLC), OOP, Data Structures & Algorithms, UML Design, Debugging

Soft Skills: Problem-Solving, Team Collaboration, Communication, Self-learning, Adaptability

Certifications & Courses

Front End Development — Great Learning

2024

Programming Basics — Great Learning

2024

Meta Full-Stack Web Development — Meta

2025

UI/UX Design — Error Makes Clever

2026

Java Programming and Software Engineering Fundamentals Specialization — Duke University

2026

Gemini Certified Student — Google for Education

2026

Achievements & Leadership

- Team Leader: Successfully led multiple group projects utilizing Agile methodology.
- Built and actively maintain a comprehensive GitHub portfolio showcasing real-world applications.
- Recognized for strong problem-solving skills and adherence to clean coding practices.
